

<b>Module Title:</b>	Static Mechanics
<b>Language of Instruction:</b>	English
<b>Credits:</b>	5
<b>NFQ Level:</b>	6
<b>Module Delivered In</b>	<a href="#">4 programme(s)</a>
<b>Teaching &amp; Learning Strategies:</b>	The student will be exposed to learning experiences grounded in both classroom and virtual practice. The experiences will be linked through collective analysis, teamwork, and individual challenges.
<b>Module Aim:</b>	To provide the student with an understanding of the underlying scientific principles of Static Mechanics
<b>Learning Outcomes</b>	
<i>On successful completion of this module the learner should be able to:</i>	
LO1	Interpret written descriptions of practical static problems.
LO2	Translate written descriptions of static systems into mathematical form as part of the solution.
LO3	Select appropriate mathematical formulae for a given problem and solve.
LO4	Perform experiments on mechanical engineering science topics and interpret the results.
