

RequirementsThis is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.

No requirements listed

MATH C2502: Mathematics and Statistics II

University						
Module Title:		Mathematics and Statistics II				
Language of Instruction:		English				
Credits: 5						
NFQ Level: 7						
Module Deli	ivered In	2 programme(s)				
Teaching & Learning Strategies:		Lectures, private study				
Module Aim:		The aim of the module is to develop students' mathematical and statistical skills and reasoning so that they can apply these skills to engineering applications.				
Learning O	utcomes					
On successi	On successful completion of this module the learner should be able to:					
LO1	Use vector methods to solve simple problems involving forces and motion.					
LO2	Use Gaussian elimination to solve sets of linear equations.					
LO3	Assess the reliability of estimates of means from sample data.					
LO4	Construct and interpret hypothesis tests for sample data.					
Pre-requisit	te learning					
	commendations learning (or a pra	ctical skill) that is recommended before enrolment in this module.				
No recommendations listed						
Incompatible Modules These are modules which have learning outcomes that are too similar to the learning outcomes of this module.						
No incompatible modules listed						
Co-requisite Modules						
No Co-requisite modules listed						

MATH C2502: Mathematics and Statistics II

Module Content & Assessment

Indicative Content

Probability and statistics

(a) Review of the normal distribution probabilities (b) Sampling and sampling distributions (c) Confidence intervals and confidence limits for the mean (b) Hypothesis tests for the mean and the difference between two means (e) Chi-square goodness-of-fit test.

Introduction to vectors

(a) Definition of vectors and scalars (b) Vector algebra (c) Cartesian component vectors (d) Applications involving forces and motion.

Matrix methods

(a) Review of matrix algebra (b) Solving systems of linear equations using Gaussian and Gauss-Jordan elimination (d) Engineering applications.

Assessment Breakdown	%
Continuous Assessment	50.00%
End of Module Formal Examination	50.00%

Continuous Assessment					
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date	
Short Answer Questions	Quiz questions	1,2,3,4	20.00	Ongoing	
Examination	Class test	1,2	15.00	Week 6	
Examination	Class test	3,4	15.00	Week 11	

No Project	
------------	--

No Practical

End of Module Formal Examination				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Formal Exam	End of module examination	1,2,3,4	50.00	End-of-Semester

SETU Carlow Campus reserves the right to alter the nature and timings of assessment

MATH C2502: Mathematics and Statistics II

Module Workload

Workload: Full Time		
Workload Type	Frequency	Average Weekly Learner Workload
Lecture	12 Weeks per Stage	4.00
Estimated Learner Hours	15 Weeks per Stage	6.00
	Total Hours	138.00

Module Delivered In

Programme Code	Programme	Semester	Delivery
CW_CMHCE_B	Bachelor of Engineering (Honours) in Civil Engineering	3	Mandatory
CW_CMCIV_D	Bachelor of Engineering in Civil Engineering	5	Mandatory
