

<b>Module Title:</b>	Mathematics and Statistics III
<b>Language of Instruction:</b>	English
<b>Credits:</b>	5
<b>NFQ Level:</b>	8
<b>Module Delivered In</b>	<a href="#">1 programme(s)</a>
<b>Teaching &amp; Learning Strategies:</b>	Lectures, practicals, private study
<b>Module Aim:</b>	The aim of the module is to develop students' ability to apply the concepts of probability and statistical analysis to civil engineering systems.
<b>Learning Outcomes</b>	
<i>On successful completion of this module the learner should be able to:</i>	
LO1	Apply appropriate probability distribution functions to examples encountered in a civil engineering context.
LO2	Complete reliability calculations for simple engineering systems.
LO3	Construct and interpret statistical quality control charts based on means and ranges.
LO4	Use regression analysis to explore relationships between variables and measure the strength of such relationships.
<b>Pre-requisite learning</b>	
<b>Module Recommendations</b>	
<i>This is prior learning (or a practical skill) that is recommended before enrolment in this module.</i>	
No recommendations listed	
<b>Incompatible Modules</b>	
<i>These are modules which have learning outcomes that are too similar to the learning outcomes of this module.</i>	
No incompatible modules listed	
<b>Co-requisite Modules</b>	
No Co-requisite modules listed	
<b>Requirements</b>	
<i>This is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.</i>	
No requirements listed	

## Module Content & Assessment

Indicative Content
<b>Probability distributions</b> (a) Review of Binomial, Poisson, Geometric and Hypergeometric distributions. (b) Review of Uniform, Exponential, Normal distributions and Sampling distributions. (c) Application of these discrete and continuous probability distributions to civil engineering contexts.
<b>Reliability and quality control</b> (a) Lifetime distributions and reliability calculations. (b) The Weibull distribution. (c) Statistical quality control. (d) Control charts based on means and ranges.
<b>Regression and correlation</b> (a) Review of regression and correlation concepts previously covered. (b) Evaluating the linear regression model. (c) Regression analysis in Excel. (d) Confidence intervals and prediction intervals for the mean response. (e) Transforming non-linear models. (f) Multiple linear regression.

Assessment Breakdown	%
Continuous Assessment	60.00%
Practical	40.00%

Continuous Assessment				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Examination	Class Test 1	1,2	30.00	Week 8
Examination	Class Test 2	4	15.00	Week 13
Short Answer Questions	Quiz questions	1,2,4	15.00	Ongoing

No Project

Practical				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Practical/Skills Evaluation	Assessed Practical 1	3	10.00	Week 6
Practical/Skills Evaluation	Assessed Practical 2	4	30.00	Week 12

No End of Module Formal Examination

SETU Carlow Campus reserves the right to alter the nature and timings of assessment

**Module Workload**

<b>Workload: Full Time</b>		
<i>Workload Type</i>	<i>Frequency</i>	<i>Average Weekly Learner Workload</i>
Lecture	12 Weeks per Stage	2.00
Practicals	12 Weeks per Stage	1.00
Estimated Learner Hours	15 Weeks per Stage	7.00
Total Hours		141.00
