

<b>Module Title:</b>	Highway & Traffic Engineering II
<b>Language of Instruction:</b>	English
<b>Credits:</b>	5
<b>NFQ Level:</b>	8
<b>Module Delivered In</b>	<a href="#">2 programme(s)</a>
<b>Teaching &amp; Learning Strategies:</b>	Lectures Project Work Private Study
<b>Module Aim:</b>	To give students a comprehensive understanding of: (1) the design and construction of rigid pavements (2) the requirements for scheme appraisals for road projects (3) the maintainance and management of roads in Ireland. (4) health and safety considerations in road projects and road maintainance

Learning Outcomes	
<i>On successful completion of this module the learner should be able to:</i>	
LO1	Model road networks and use mathematical modelling techniques to predict future traffic flow on the network.
LO2	Design rigid pavement structures and detail the construction processes and construction issues for rigid pavements.
LO3	Explain the road maintenance programmes used by TII and Local Authorities.
LO4	Appraise highway projects from cost, environmental and safety perspectives.
LO5	Appraise the health and safety and traffic management implications for roads projects.

Pre-requisite learning	
<b>Module Recommendations</b> <i>This is prior learning (or a practical skill) that is recommended before enrolment in this module.</i>	
No recommendations listed	
<b>Incompatible Modules</b> <i>These are modules which have learning outcomes that are too similar to the learning outcomes of this module.</i>	
No incompatible modules listed	
<b>Co-requisite Modules</b>	
No Co-requisite modules listed	
<b>Requirements</b> <i>This is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.</i>	
Highway & Traffic Engineering I	

## Module Content & Assessment

### Indicative Content

#### Design of Rigid Pavement

(a) Types of rigid highway pavements (b) Material used in rigid pavement (c) Joints in concrete Pavements (d) Rigid Pavement Distress (e) Rigid Pavement Construction (f) Thickness design of rigid pavements using: (i) RR87 (Mayhew & Harding, 1987); (ii) TII DMRB HD 25-26

#### Performance Testing of Road Pavements and Pavement Maintenance

(a) Structural Performance (FWD, Deflectograph, Deflection Beams) (b) Visual Condition (PCI, Digital Video, PSCI) (c) Skid Resistance - Microtexture (Scrim, PSV, Griptester) Skid Resistance Macrotester (Patch Test, Laser Measurement) (d) Ride Quality/Roughness (IRI, RSP) (e) Overlay Design (f) Surface Dressing Design

#### Predicting Future Traffic Flow

Mathematical Models (a) (i) Trip Generation Model (ii) Gravity Model (iii) Growth Factor Model (iv) Furness Model (v) Trib Distribution Model (vi) Modal Split Model (vii) Traffic Assignment Model (b) Applications of the modelling process to a road network

#### Evaluating Transportation Alternatives

(a) Basic elements of transportation planning (b) Basic issues in evaluation (c) Evaluation based on economic criteria (d) Evaluation based on multiple criteria

#### Appraisal of Roads Projects

(a) Economic Appraisal of Road Schemes (b) Cost Benefit Analysis – discount rate, Discounted Costs, Discounted Benefits, Net Present Value, Internal Rate of Return, Residual Value, Payback Analysis (c) Environmental Appraisal of Road Schemes

#### Health and Safety for Road Projects

(a) Legal requirements (b) Health and Safety duties/responsibilities/liabilities of Client, PSDP, PSCP and others on roads projects (c) Road Safety Audits (d) Temporary road works design

Assessment Breakdown	%
Continuous Assessment	20.00%
Project	20.00%
End of Module Formal Examination	60.00%

### Continuous Assessment

Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Other	End of term exams	1,2,3,4,5	20.00	n/a

### Project

Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Project	No Description	1,2,3,4,5	20.00	Sem 1 End

No Practical

### End of Module Formal Examination

Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Formal Exam	No Description	1,2,3,4,5	60.00	End-of-Semester

SETU Carlow Campus reserves the right to alter the nature and timings of assessment

**Module Workload**

<b>Workload: Full Time</b>		
<i>Workload Type</i>	<i>Frequency</i>	<i>Average Weekly Learner Workload</i>
Lecture	30 Weeks per Stage	2.00
Estimated Learner Hours	30 Weeks per Stage	3.67
Total Hours		170.00

**Module Delivered In**
