| Teaching & Learning Strategies: | The learning outcomes detailed above will be achieved through the following teaching methodologies: 1. Lectures - interactive communication of knowledge and ideas from the lecturer to the student, using Powerpoint presentations and e-learning resources, with ongoing questions and discussion encouraged. 2. Tutorials: smaller group learning with more time for individual and small group attention and feedback. 3. Active & collaborative learning in both lectures and tutorials, with class and group discussion: students will be encouraged to actively participate, to reflect on cases from their work experience in the context of new lecture material. They will be encouraged to share queries, ethical dilemmas and learning, with due respect to confidentiality for all involved. This will enable them to make the theory-practice link under the guidance of the lecturer/ tutor. This will also develop their analytical, reflective and communication skills. 4. Case Studies - students will reflect on, discuss and evaluate clinical scenarios related to lecture content. 5. Group work & class discussion: students will work together in small groups.6.. E-Learning — It is envisaged that the module will be supported with on-line learning materials including discussion boards. 7. Self-Directed Independent Learning through reading of books, peer-reviewed journal articles, policy documents, governmental publications and international best practice guidelines. D1: P 1, 2, 3, 5, 6, 8, 9, 10, 11, 13, 17, 19, 22, 23. D2: P 1, 2, 3, 4, 9, 10, 12, 13, 14, 15, 17. D3: P 1,2, 4, 5, 6, 7, 8, 9, 10, 14, 15. D4: P 3, 4, 5.
