Module Delivered In	3 programme(s)

Teaching & Learning Strategies:	A mixture of traditional lectures, problem solving tutorials and laboratory work

Module Aim:	To provide the student with a competence and understanding of the fundamental mathematics required to function in the field of Interactive Digital Media Design.

Learning Outcomes
On successful completion of this module the learner should be able to:

LO1	identify common functions from their graphs;
LO2	organise, present and statistically analyse data;
LO3	perform appropriate numerical techniques to model patterns identified in large data sets;
LO4	write computer programmes to further explore the concepts of this syllabus.
