| Module Title: | Object Oriented Programming |
| Language of Instruction: | English |
| Credits: | 5 |
| NFQ Level: | 6 |
| Module Delivered In | 1 programme(s) |
| Teaching & Learning Strategies: | The course material will be delivered by a mixture of traditional lectures and laboratory based lectures where learners can explore programming constructs as they are introduced. Students will also be assigned practical exercises that address the learning outcomes. |
| Module Aim: | To provide learners with object-oriented programming skills and use object-oriented techniques to solve problems of moderate complexity. |
| Learning Outcomes | |
| <i>On successful completion of this module the learner should be able to:</i> | |
| LO1 | Develop small components in C++ using the object-oriented paradigm. |
| LO2 | Demonstrate a practical knowledge of memory allocation and the application of pointers, smart pointers and references. |
| LO3 | Use a profiling tool to identify potential bottlenecks in an application. |
| Pre-requisite learning | |
| Module Recommendations | |
| <i>This is prior learning (or a practical skill) that is recommended before enrolment in this module.</i> | |
| No recommendations listed | |
| Incompatible Modules | |
| <i>These are modules which have learning outcomes that are too similar to the learning outcomes of this module.</i> | |
| No incompatible modules listed | |
| Co-requisite Modules | |
| No Co-requisite modules listed | |
| Requirements | |
| <i>This is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.</i> | |
| Successful completion of year 1 or equivalent | |

Module Content & Assessment

| Indicative Content |
|--|
| Introduction and language features Compilation process, IO and standard libraries, addresses and pointers, fundamental language features (type checking, cast operators, function overloading, default function arguments, enumerations) |
| OOP core concepts part 1 Classes, members and construction functions, composition, header file organisation. |
| OOP core concepts part 2 Inheritance: generalisations, specialisation, abstract classes and polymorphism, RTTI operators. |
| Memory management Operators new, delete and delete [], rule of three, smart pointers, move semantics (rule of five). |
| Optimising code Performance and optimisations, introduction to profiling. |

| Assessment Breakdown | % |
|----------------------------------|--------|
| Continuous Assessment | 20.00% |
| Practical | 40.00% |
| End of Module Formal Examination | 40.00% |

| Continuous Assessment | | | | |
|-----------------------|------------------------|-------------------|------------|-----------------|
| Assessment Type | Assessment Description | Outcome addressed | % of total | Assessment Date |
| Other | Class exam | 1 | 20.00 | Week 6 |

No Project

| Practical | | | | |
|-----------------------------|---|-------------------|------------|-----------------|
| Assessment Type | Assessment Description | Outcome addressed | % of total | Assessment Date |
| Practical/Skills Evaluation | Participation in and completion of practical work | 1,2,3 | 40.00 | n/a |

| End of Module Formal Examination | | | | |
|----------------------------------|-------------------------------|-------------------|------------|-----------------|
| Assessment Type | Assessment Description | Outcome addressed | % of total | Assessment Date |
| Formal Exam | 90 minute written examination | 1,2 | 40.00 | End-of-Semester |

SETU Carlow Campus reserves the right to alter the nature and timings of assessment

Module Workload

| Workload: Full Time | | |
|----------------------------|--------------------|--|
| <i>Workload Type</i> | <i>Frequency</i> | <i>Average Weekly Learner Workload</i> |
| Lecture | 12 Weeks per Stage | 1.00 |
| Laboratory | 12 Weeks per Stage | 4.00 |
| Estimated Learner Hours | 15 Weeks per Stage | 4.33 |
| Total Hours | | 125.00 |

Module Delivered In

| Programme Code | Programme | Semester | Delivery |
|----------------|---|----------|-----------|
| CW_KCCGD_B | Bachelor of Science (Honours) in Computer Games Development | 3 | Mandatory |
