AVIO C1605: Avionics Fundamentals 2

| University | | | | | |
|------------------------------------|----------------------------------------------------------------------------------------------------------|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|
| Module Title: | | | Avionics Fundamentals 2 | | |
| Language of Instruction: | | n: | English | | |
| Credits: 10 | | 10 | | | |
| | | | | | |
| NFQ Level: | | 6 | | | |
| Module Del | ivered In | | 2 programme(s) | | |
| Teaching & Learning Strategies: | | | A series of lectures, tutorials, class-based tasks, and laboratory exercises will be used. The practical sessions will be used to support the theory. The Institute VLE will be used to interactively communicate wit students. | | |
| Module Aim: | | | To give students an understanding of the principles of avionic circuits. To develop the student's ability to analyse the behaviour of avionic circuits. | | |
| Learning O | utcomes | | | | |
| On success | ful completio | n of th | his module the learner should be able to: | | |
| LO1 | O1 Interpret the fundamentals of electric and electronic circuits. | | | | |
| LO2 | Perform calculations to permit the analysis of both DC and | | tions to permit the analysis of both DC and AC circuits. | | |
| LO3 | Comprehend the | | e functional operation of common digital electronic devices. | | |
| LO4 | Work in an elec | | tronic laboratory with due regard for his/her safety and that of others. | | |
| LO5 | Using schematic diagrams, build and test electrical and electronic circuits in a laboratory environment. | | c diagrams, build and test electrical and electronic circuits in a laboratory environment. | | |
| Pre-requisi | te learning | | | | |
| | commendat learning (or | | ctical skill) that is recommended before enrolment in this module. | | |
| No recommo | endations lis | ted | | | |
| Incompatib These are n | | h hav | e learning outcomes that are too similar to the learning outcomes of this module. | | |
| No incompa | No incompatible modules listed | | | | |
| Co-requisit | Co-requisite Modules | | | | |

RequirementsThis is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.

AVIO C1605: Avionics Fundamentals 2

Module Content & Assessment

| Indicative Content | |
|--------------------------------------------------------------------------|--|
| Generation of Electricity Production of electricity. | |
| Magnetism Theory of magnetism. | |
| DC Motor Basic motor theory. | |
| Inductance/Inductor Induction principles. | |
| Transformers Transformer construction principles and operation. | |
| RLC Circuits Phasor analysis of RLC circuits. | |
| Filters Operation, application and uses of filters. | |
| Transistors Transistor characteristics, properties and applications. | |
| Integrated Circuits Description and operation of digital logic circuits. | |

| Assessment Breakdown | % | |
|-----------------------|--------|--|
| Continuous Assessment | 60.00% | |
| Practical | 40.00% | |

| Continuous Assessment | | | | | |
|-----------------------|---------------------------------------------|----------------------|---------------|--------------------|--|
| Assessment Type | Assessment Description | Outcome addressed | % of total | Assessment Date | |
| Other | Several in class and/or online assessments. | 1,2,3 | 60.00 | Ongoing | |

No Project

| Practical | | | | | |
|--------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|---------------|--------------------|--|
| Assessment Type | Assessment Description | Outcome addressed | % of total | Assessment Date | |
| Practical/Skills Evaluation | Practical Assignments: The student will complete practical assignments during the module and write a report on each assignment. Practical tests: Learners will complete practical tasks for summative assessment. | 1,2,3,4,5 | 40.00 | Every Week | |

No End of Module Formal Examination

SETU Carlow Campus reserves the right to alter the nature and timings of assessment

AVIO C1605: Avionics Fundamentals 2

Module Workload

| Workload: Full Time | | |
|----------------------|-----------------------|---------------------------------------|
| Workload Type | Frequency | Average Weekly Learner Workload |
| Lecture | 12 Weeks per Stage | 5.00 |
| Practicals | 12 Weeks per Stage | 4.00 |
| Independent Learning | 15 Weeks per Stage | 9.47 |
| | Total Hours | 250.00 |

Module Delivered In

| Programme Code | Programme | Semester | Delivery |
|----------------|------------------------------------------------------------|----------|-----------|
| CW_EEAER_B | Bachelor of Engineering (Honours) in Aerospace Engineering | 2 | Mandatory |
| CW_EEACS_D | Bachelor of Engineering in Aircraft Systems | 2 | Mandatory |
