STRU H3603: Aircraft Structures

University					
Module Title:			Aircraft Structures		
Language of Instruction:		ո։	English		
Credits: 5		5			
NFQ Level:		7			
Module Delivered In			2 programme(s)		
Teaching & Learning Strategies:			This module will be taught by Lectures, Tutorials & Practical Tasks and by using Model & Actual Aircraft and Sample Questions.		
Module Aim:			The student will understand standard airframe components, structures and standard practices so they develop basic analytical, troubleshooting and practical skills essential to an aircraft technician.		
Learning Ou	itcomes				
On successfu	ul completion	n of th	his module the learner should be able to:		
LO1	Explain the general design concepts of an aircraft structure				
LO2	Compare a	and co	ontrast the various methods of aircraft construction		
LO3	Identify and compare the various types of air/rotorcraft fuselage, wing and structural designs				
LO4	Categorise primary, secondary and tertiary flight control construction methods				
Pre-requisite	e learning				
Module Recommendations This is prior learning (or a practical skill) that is recommended before enrolment in this module.					
No recommendations listed					
Incompatible Modules These are modules which have learning outcomes that are too similar to the learning outcomes of this module.					
No incompatible modules listed					
Co-requisite Modules					

STRU H3603: Aircraft Structures

Module Content & Assessment

Indicative Content

Airframe Structures - General Concepts

Airworthiness requirements for structural strength; Structural classification, primary, secondary and tertiary; Fail safe, safe life, damage tolerance concepts; Zonal and station identification systems; Stress, strain, bending, compression, shear, torsion, tension, hoop stress, fatigue; Drains and ventilation provisions; System installation provisions; Lightning strike protection provision. Aircraft bonding Construction methods of: stressed skin fuselage, formers, stringers, longerons, bulkheads, frames, doublers, struts, ties, beams, floor structures, reinforcement, methods of skinning, anti-corrosive protection, wing, empennage and engine attachments; Structure assembly techniques: riveting, bolting, bonding; Methods of surface protection, such as chromating, anodising, painting; Surface cleaning; Airframe symmetry: methods of alignment and symmetry checks

Airframe Structures - Aeroplanes
Fuselage (ATA 52/53/56): Construction and pressurisation sealing; Wing, stabiliser, pylon and undercarriage attachments; Seat installation and cargo loading system; Doors and emergency exits: construction, mechanisms, operation and safety devices; Windows and windscreen construction and mechanisms Wings (ATA 57) Construction; Fuel storage; Landing gear, pylon, control surface and high lift/drag attachments (ATA 55) Construction; Control surface attachment Fight Control Surfaces (ATA 555/57) Construction and attachment; Balancing - mass and aerodynamic Nacelles/Pylons (ATA 54) Nacelles/Pylons: - Construction; - Firewalls; - Engine mounts

Flight Controls (ATA 27)

Primary controls: aileron, elevator, rudder, spoiler; Trim control; Active load control; High lift devices; Lift dump, speed brakes; System operation: manual, hydraulic, pneumatic, electrical, Fly-by-wire; Artificial feel, Yaw damper, Mach trim, rudder limiter, gust locks systems; Balancing and rigging; Stall protection/warning system

Assessment Breakdown	%
Continuous Assessment	30.00%
Project	40.00%
Practical	30.00%

Continuous Assessment				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Written Report	Each student will accurately record and collate evidence of their practical tasks/activities into a Training Logbook, during term time for which a maximum of 30% will be awarded	1,2,3,4	30.00	n/a

Project				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Project	Each student will record and collate a range of their own personal experiences into a Journal/Reflective Learning Portfolio, during term time for which a maximum of 40% will be awarded	1,2,3,4	40.00	n/a

Practical				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Practical/Skills Evaluation	Each student will successfully complete a range of Practical Labs/Engineering Tasks on aircraft/engines during term time for which a maximum of 30% will be awarded	1,2,3,4	30.00	n/a

No End of Module Formal Examination

SETU Carlow Campus reserves the right to alter the nature and timings of assessment

STRU H3603: Aircraft Structures

Module Workload

Workload: Full Time			
Workload Type	Frequency	Average Weekly Learner Workload	
Lecture	12 Weeks per Stage	3.00	
Practicals	12 Weeks per Stage	2.00	
Independent Learning	15 Weeks per Stage	4.33	
	Total Hours	125.00	

Module Delivered In

Programme Code	Programme	Semester	Delivery
CW_EEAER_B	Bachelor of Engineering (Honours) in Aerospace Engineering	6	Elective
CW_EEACS_D	Bachelor of Engineering in Aircraft Systems	6	Mandatory
