

ZANA C3100: Analytical Project and Workplace Planning

Module Title:	Analytical Project and Workplace Planning	
Language of Instruction	: English	
Credits:	10	
NFQ Level:	7	
Module Delivered In	2 programme(s)	
Teaching & Learning Strategies:	Project topics will be decided at the beginning of the first semester by the student in consultation with course lecturers. Topics may focus on biosciences, environmental, food & beverage, or analytical sci. The student will be expected to produce a workplan to include: 1. Aims and objectives of the project Actions necessary for the achievement of objectives 3. Sources of information to be used in the project project time plan (in consultation with the supervisor) This module will involve a large amount of labo work (60 hours) during which students will liaise and interact with supervisory staff and regularly reported progress. Analysis of results will be followed by the submission of a written project report. Learners we perform a presentation of their research project in a formal setting using appropriate audiovisual or or technologies. Lecturers and fellow students will have the opportunity to ask questions on the topic and team of supervisors will assess the presentation. Additional approaches in the module will involve: O verbal use of information technology and studio work. Hands on approach to course delivery. Workin own initiative and within a group environment. Role playing. Case studies. Problem solving approach possible. Major emphasis on teamwork skills.	cience. 2. ect 4. coratory cort on will conline and the coral and ang on
Module Aim:	To give the learner an insight in the area of project design, management, and execution, from idea generation to final outcome and interpretation of findings. To allow learners to apply their analytical reskills. To give the student an insight into the requirements of the modern work place and the prerequired for the transition from academic life to the work environment.	

Learning Outcomes			
On successf	On successful completion of this module the learner should be able to:		
LO1	Plan and implement a laboratory based analytical/research project; including choosing a topic, reviewing relevant literature/analytical methods, designing and planning the project, carrying out the required programme of experiments, and reporting and defending the project.		
LO2	Liaise with supervisors and technical staff to plan a practical programme from week to week, adapt tasks as required, demonstrate technical problem solving abilities, and work collaboratively with peers to plan access to instrumentation.		
LO3	Describe the various facets of a modern workplace and the transition from the academic to the workplace environment.		
LO4	Demonstrate proficiency in working individually or within a team setting, time management and working to schedules, organisational and entrepreneurial skills, and an ability to "hit the ground running" within the workplace.		

Pre-requisite learning

Module Recommendations
This is prior learning (or a practical skill) that is recommended before enrolment in this module.

No recommendations listed

Incompatible Modules
These are modules which have learning outcomes that are too similar to the learning outcomes of this module.

No incompatible modules listed

Co-requisite Modules

No Co-requisite modules listed

Requirements
This is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.

Successful completion of year 2 or equivalent

Module Content & Assessment

Indicative Content

Project 1.1

Choice of project, idea generation, project proposal in consultation with course lecturers.

Planning and literature survey to 'scope' the project. Safety issues, MSDS, ordering materials.

Week by week work-plan, to facilitate optimum use of and exposure to various and relevant laboratory facilities and techniques which may include, analytical, microbiological, chemical biochemical and sensory techniques as appropriate

Project 1.4
Log book design, control, and operation

Data treatment to integrate statistical evaluation

Project 1.6

Essential requirements for the transition from the academic to the work environment

Project 1.7 Methods of recruitment (job specific)

Project 1.8

Letter of application and curriculum vitae preparation (review, job specific) mock interview, demonstrate a passion

Understanding the job requirements (technical and other)

Communication skills, oral, written and presentation to groups

Project 1.11

Project presentations

Basic entrepreneurial, marketing and business skills

Project 1.13.

Company structure within Ireland and beyond

Assessment Breakdown	%
Continuous Assessment	30.00%
Project	70.00%

Special Regulation

Students must achieve a minimum grade (35%) in both the CA and project components.

Continuous Assessment				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Presentation	Group presentation	3,4	15.00	n/a
Presentation	Individual presentation	3,4	15.00	n/a

Project				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Project	Oral Presentation and Defence	1,2	10.00	Week 12
Project	Project report	1,2	60.00	Sem 2 End

No Practical

No End of Module Formal Examination

ZANA C3100: Analytical Project and Workplace Planning

Module Workload

Workload: Full Time		
Workload Type	Frequency	Average Weekly Learner Workload
Lecture	24 Weeks per Stage	1.00
Laboratory	24 Weeks per Stage	2.50
Estimated Learner Hours	24 Weeks per Stage	6.92
	Total Hours	250.00

Module Delivered In

Programme Code	Programme	Semester	Delivery
CW_SAPHA_B	Bachelor of Science (Honours) in Pharmaceutics and Drug Formulation	6	Mandatory
CW_SAASC_D	Bachelor of Science in Analytical Science	6	Mandatory
