

ZBIO C2104: Molecular Biology 2

Module Title:			Molecular Biology 2			
Language of Instruction:		:	English			
Credits: 5		5				
NFQ Level:	6	6				
Module Deli	vered In		<u>3 programme(s)</u>			
Teaching & Learning Strategies:			This module will be delivered via two 1 hour lectures and a 2 hours practical mode. Students may be required to access the material via the VLE Blackboard as applicable in advance of the class and practicals to encourage active learning. To consolidate lectures and practicals, students will normally be required to carryout assignments, give presentations and take formative quizzes. Group and peer learning will be facilitated during the preparation of assignments, presentations and practicals. Online demonstrations may be used to illustrate key concepts of the course and will be available through out the year. Digital Resources such as Youtube, Reusable Learning Objects (RLOs) and the National Digital Learning Repository (NDLR) will be used as practicable. The practical component is essential: • To allow students to develop the required technical competencies, attitudes and behaviours in a molecular biology laboratory. • To develop problem solving abilities and group skills. • To promote deep learning via investigation of a problem, application of reports written in the standard format.			
Module Aim	:		To introduce students to the fundamentals of the theory and practical aspects of Molecular Biology.			
Learning Ou	itcomes					
On successfu	ul completion	of th	is module the learner should be able to:			
LO1	An introduct cloning, res bioinformati	An introduction to extrachromosomal DNA elements such as plasmids, phage, transposons and insertion sequences. DNA cloning, restriction enzymes, expression systems, sequencing methods. PCR, DNA fingerprinting. Introduction to bioinformatics, molecular taxonomy and phylogenetic trees.				
LO2	Discuss differences between prokaryotic and eukaryotic genetic organisation and expression. Describe and give an overv of genetically modified microorganisms: hazards, risk and perceptions, containment systems. Examples of molecular biolo in biotechnology, biopharma, forensics.					
LO3	At the end of Semester 2 practical component the student is expected to: Demonstrate a range of molecular biology techniques, safely and efficiently. Be able to monitor, record and analyse experimental data. Demonstrate effective group work and good communication skills.					
Pre-requisite	e learning					
Module Rec This is prior l	ommendatio learning (or a	ns praci	tical skill) that is recommended before enrolment in this module.			
No recommendations listed						
Incompatible Modules These are modules which have learning outcomes that are too similar to the learning outcomes of this module.						
No incompatible modules listed						
Co-requisite Modules						
No Co-requisite modules listed						
Requirements This is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.						
Successful completion of year 1 or equivalent.						

ZBIO C2104: Molecular Biology 2

Module Content & Assessment

Indicative Content

Informational Macromolecules

An introduction to organisation and cell structure in prokaryotic and eucaryotic organisms. Structural components of informational macromolecules: purines and pyrimidines; nucleosides and nucleotides; basic nucleic acid structure. Occurrence and functions of nucleic acids; primary structure of nucleic acids. Secondary structure: the Double Helix. Double-stranded RNA. Tertiary structure of DNA – the Superhelix. DNA organisation in prokaryotic and eucaryotic organisms. Physical properties of DNA with particular emphasis on thermal denaturation. Renaturation and hybridisations of DNA. Restriction and modification. A brief introduction to nucleic acid sequencing

Transfer of Genetic Information

An introduction to the Central Dogma of Molecular Biology, biological information flow: replication. transcription and translation. DNA replication in prokaryotes and eukaryotes. RNA transcription in prokaryotes and eukaryotes. Structure and function of RNA: mRNA, tRNA and their role in protein synthesis. The Genetic Code, codons, anticodons. Translation: the fundamental principles of protein synthesis. Posttranslational modification.

Practical

At the end of the practical component the student is expected to be: Competent in the manipulation and handling and disposal of recombinant organisms and molecules with due respect to cGLP and health and safety, monitor, record and analyse experimental data in molecular biology, operate the range of instrumentation specified safely and effectively in the laboratory and work effectively in a group and demonstrate good written and oral communication skills

Assessment Breakdown	%
Continuous Assessment	20.00%
Practical	30.00%
End of Module Formal Examination	50.00%

Special Regulation

Learners must achieve a minimum of 35% in CA/Practical and Final Examination

Continuous Assessment					
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date	
Other	Continuous assessment will take the form, of in class tests, specific assignments and presentations	1,2	20.00	n/a	

No Project

Assessment Type Assessment Description		Outcome addressed	% of total	Assessment Date
Practical/Skills EvaluationPractical skills and competencies will be kept laboratory notebook (which will be observation of skills and a practical ex-	e assessed via a correctly submitted on time), am.	3	30.00	n/a

End of Module Formal Examination					
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date	
Formal Exam	No Description	1,2	50.00	End-of-Semester	

SETU Carlow Campus reserves the right to alter the nature and timings of assessment

ZBIO C2104: Molecular Biology 2

Module Workload

Workload: Full Time			
Workload Type	Frequency	Average Weekly Learner Workload	
Lecture	12 Weeks per Stage	2.00	
Laboratory	12 Weeks per Stage	2.00	
Estimated Learner Hours	15 Weeks per Stage	5.13	
	Total Hours	125.00	

Module Delivered In

Programme Code	Programme	Semester	Delivery
CW_SABTP_B	Bachelor of Science (Honours) in Biosciences with Biopharmaceuticals	4	Mandatory
CW_SABFQ_D	Bachelor of Science in Biosciences	4	Mandatory
CW_SASCI_C	Higher Certificate in Science in Applied Biology or Applied Chemistry	4	Group Elective 1
