ENVI: Advanced 2D and 3D Environmental Modeling

		4.8.	University		
Module Title:			2D and 3D Environmental Modeling		
Language of Instruction:		n:	English		
Credits:		5			
NFQ Level:		8			
Module Deliv	vered In		1 programme(s)		
Teaching & Learning Strategies:			Tutorials, Demonstrations, project work, case studies, videos, field trip, location research. Module will be delivered though a studio based environment with lecture / practical and project work running in conjunction with each other		
Module Aim:			The aim of the module is to introduce the process by which a game environment is created, from concept art to final game environment in industry standard software. Through a practical project framework, students learn the tools and skills needed to create 2D & 3D environments for games, 3D props, 3D modeling and 3D assets for use across the interactive digital art and design area.		
Learning Out	tcomes				
On successfu	ıl completioi	n of th	nis module the learner should be able to:		
LO1	Develop an understanding of the interactive experience, and environment creation process from concept and practical production of the final environments. Understand and develop skills in the area of photogrammetry to development of effective and immersive environment and props.		tion of the final environments. Understand and develop skills in the area of photogrammetry to aid in the		
LO2	Be fluent in the range of tools and skills necessary for environment modeling including poly Modeling, Texture creation/ Material creation, optimizing assets for real time use		range of tools and skills necessary for environment modeling including poly Modeling, Texture creation/ n, optimizing assets for real time use		
LO3	Be aware of the role of the environment artist / designer in a design development process, consider dependencies in other aspects of design production, assess technical requirements and limitations of a target platform or technology and successfully design and produce assets to specification. Understand the work flow and process of a studio environment and collaborate effectively allowing for an adaptive design process, taking on critical evaluation and adapting design work to incorporate it.				
Pre-requisite	e learning				
Module Reco			ctical skill) that is recommended before enrolment in this module.		
No recommer	ndations list	ed			
Incompatible These are mo		h have	e learning outcomes that are too similar to the learning outcomes of this module.		
No incompatil	ble modules	s liste	d		

Requirements

This is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.

ENVI: Advanced 2D and 3D Environmental Modeling

Module Content & Assessment

Indicative Content

Concept analysis and planning

Concept analysis and planning immersive environments for Story telling purposes. Interpreting story concept for world design.

Modeling & SculptingPolygonal modeling. Navigation, object creation, polygonal modeling, Box modeling.

Scene Layout
Scene Layout, Low poly modeling, working from designs/ Blueprints, using reference, Scene blocking,testing iterative development.

Modular Design, Asset Linking techniques. generated and repeating materials/ texture maps. Designing for re-use.

Materials and Lighting
Materials and Lighting, Texture painting, tiling textures, Light baking.

Game engine integrationGame engine integration, Physics, collisions, engine prep.

Assessment Breakdown	%
Project	40.00%
Practical	60.00%

No Continuous Assessment

Project					
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date	
Project	The subject will be assessed through the completion of project briefs and the submission of a final solution and research journal/ notebook / Sketchbook. The assessment and feedback will be an opportunity for the student to focus on their work and evaluate their own progress and development.	1,2,3	20.00	Week 6	
Project	The subject will be assessed through the completion of multiple project briefs and the submission of a final solution and research journal/notebook / Sketchbook. The assessment and feedback will be an opportunity for the student to focus on their work and evaluate their own progress and development. Projects will be run as part of a studio based environment	1,2,3	20.00	Week 13	

Practical				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Practical/Skills Evaluation	The subject will be assessed through the completion of in-class tutorials & practical assignments. The assessment and feedback will be an opportunity for the student to focus on their work and evaluate their own progress and development.	1,2	5.00	Week 2
Practical/Skills Evaluation	The subject will be assessed through the completion of in-class tutorials & practical assignments. The assessment and feedback will be an opportunity for the student to focus on their work and evaluate their own progress and development.	1,2	10.00	Week 3
Practical/Skills Evaluation	The subject will be assessed through the completion of in-class tutorials & practical assignments. The assessment and feedback will be an opportunity for the student to focus on their work and evaluate their own progress and development.	1,2	5.00	Week 4
Practical/Skills Evaluation	The subject will be assessed through the completion of in-class tutorials & practical assignments. The assessment and feedback will be an opportunity for the student to focus on their work and evaluate their own progress and development.	1,2	5.00	Week 5
Practical/Skills Evaluation	The subject will be assessed through the completion of in-class tutorials & practical assignments. The assessment and feedback will be an opportunity for the student to focus on their work and evaluate their own progress and development.	1,2	5.00	Week 7
Practical/Skills Evaluation	The subject will be assessed through the completion of in-class tutorials & practical assignments. The assessment and feedback will be an opportunity for the student to focus on their work and evaluate their own progress and development.	1,2	10.00	Week 8
Practical/Skills Evaluation			5.00	Week 9
Practical/Skills Evaluation	The subject will be assessed through the completion of in-class tutorials & practical assignments. The assessment and feedback will be an opportunity for the student to focus on their work and evaluate their own progress and development.	1,2	10.00	Week 10
Practical/Skills Evaluation The subject will be assessed through the completion of in-class tutorials & practical assignments. The assessment and feedback will be an opportunity for the student to focus on their work and evaluate their own progress and development.		1,2	5.00	Week 11

No End of Module Formal Examination
