

# MATH C3604: Engineering Mathematics 3

Module Title:			Engineering Mathematics 3		
Language of Instruction:		n:	English		
Credits: 5					
creans.		5			
NFQ Level:		7			
Module Deliv	vered In		<u>3 programme(s)</u>		
Teaching & Learning Strategies:			(a) A series of lectures will be delivered using whiteboard and data projector. (b) The Institute Virtual Learning Environment (VLE) will be used to interactively communicate with students e.g. on-line test, discussion forums, reference information		
Module Aim	:		To give the students the knowledge, competencies and skills necessary to support the mathematical procedures encountered in the other modules of this course.		
Learning Ou	tcomes				
On successfu	ul completio	n of th	nis module the learner should be able to:		
LO1	.01 Solve Second order differential equations.				
LO2	Solve initia	al valu	e problems through the application of Laplace transforms.		
LO3	LO3 Analyse periodic waveforms through the application of Fourier series.				
Pre-requisite learning					
Module Recommendations This is prior learning (or a practical skill) that is recommended before enrolment in this module.					
No recomme	ndations list	ted			
Incompatible		h have	e learning outcomes that are too similar to the learning outcomes of this module.		
No incompati	ble modules	s liste	d		
Co-requisite Modules					
No Co-requis	ite modules	s listed	1		
<b>Requirements</b> This is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.					
Mathematics 2 or equivalent					

# MATH C3604: Engineering Mathematics 3

# Module Content & Assessment

## Indicative Content

### **A.Differential Equations**

Solve second order homogeneous and non-homogeneous differential equations.

### **B.Fourier Series**

Recognise periodic functions. Even and odd functions. Be able to obtain the Fourier Series of a periodic function. Derive half-range sine and cosine series

**C.Laplace Transforms** Find the Laplace Transform of standard functions. Find inverse Laplace Transforms. Find the Laplace Transform of derivatives and use Laplace Transforms to solve IVP's.

Assessment Breakdown	%
Continuous Assessment	40.00%
End of Module Formal Examination	60.00%

### Continuous Assessment

Assessment	Assessment Description	Outcome	% of	Assessment
Type		addressed	total	Date
Examination	A number of CA's will be evenly spaced throughout the Semester to allow timely feedback to be provided".	1,2,3	40.00	n/a

### No Project

No Practical

End of Module Formal Examination				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Formal Exam	Each student will sit a formal written examination at the end of the module for which 60% will be awarded.	1,2,3	60.00	End-of- Semester

Continuous Assessment				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
