ZWKP H4101: Work Placement Bioscience/Biopharmaceuticals

Indicative Content

Module Content & Assessment

Placement

The work placement will generally involve work in private enterprises, consultancy firms, government departments or non-governmental organisations in Ireland or abroad. The work placement can alternatively involve participation in an appropriate research project. Students who already have extensive and relevant work experience from third year of the programme may be exempt from the full work placement in fourth year on a case by case basis. The work placement will normally commence after the students have taken their final examinations i.e. early June of 4th year for a minimum of 12 weeks. Suitable work place experience of a similar duration if acquired between 3rd and 4th year may also be considered to fulfill this element of the course. The Careers Office at IT Carlow will be supported by the course board and placement coordinator to ensure that all students are placed in a relevant work environment. Members of the course board will monitor the students' progress throughout placement by maintaining contact with both the student and the supervisor in the host organisation. In an instance when a student is unable to take up an outside placement activities and tasks. This may include a comprehensive study on the organisational structure, mission, products, services and current and emerging trends relating to the company or organisation.

Assessment Breakdown	%
Continuous Assessment	100.00%

Continuous As	ssessment			
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Other	A detailed work placement report submitted to the college placement supervisor at the end of placement. This module is graded as Pass/Fail	1,2,3,4,5	100.00	n/a
