

Module Title:	Project
Language of Instruction:	English
Credits:	10
NFQ Level:	8
Module Delivered In	1 programme(s)
Teaching & Learning Strategies:	The lecturer(s) in consultation with the student(s) will determine the nature, title and scope of the project. Project supervisor(s) will meet with student(s) at regular intervals. Students will be expected to lead the project experience, with the lecturer in a supervisory, supportive role.
Module Aim:	The aim of the project is to provide the student with the opportunity to apply the knowledge and skills developed on the programme to produce and research a substantial body of work within a format of their choosing.

Learning Outcomes	
<i>On successful completion of this module the learner should be able to:</i>	
LO1	Undertake primary and secondary research on a topic involving multiple disciplines within the course
LO2	Draw reasonable and objective conclusions from the processes described above.
LO3	Demonstrate a comprehensive understanding and in-depth engagement with key elements in their chosen subject field.
LO4	Demonstrate effective time management skills in meeting designated deadlines
LO5	Exhibit the ability to undertake self-directed learning.

Pre-requisite learning
Module Recommendations <i>This is prior learning (or a practical skill) that is recommended before enrolment in this module.</i>
No recommendations listed
Incompatible Modules <i>These are modules which have learning outcomes that are too similar to the learning outcomes of this module.</i>
No incompatible modules listed
Co-requisite Modules
No Co-requisite modules listed
Requirements <i>This is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.</i>
No requirements listed

Module Content & Assessment
Indicative Content
Other Appropriate Discourse (50% or 100%)

Potential project choices will be pitched by students and evaluated by lecturers. These choices should reflect areas of study covered throughout the programme and provide a challenging learning or research proposal for the students. Their viability and academic quality will be analysed by the project supervisors. Projects can be group or individual proposals and may run year-long or two projects over two semesters.

Self-directed learning

Students should exhibit skills in planning, organisation and time management. They should take a self-directed approach to their project and communicate clearly throughout.

Student-led

The Final Year Project is a student-led experience, aimed at developing the student as an independent learner.

Role of Supervisor

The role of the supervisor is to ensure that the project is feasible in scope, practicality and ability. They will identify potential limitations and suggest alternative directions. However, the direction and evolution of the project will be driven by the student.

Expectations on Students

The Final Year Project is first and foremost the student's responsibility. Students are expected to collaborate with their supervisor to set out a plan of work and set realistic milestones. Attend meetings as arranged with supervisor. Have work prepared ahead of time for the meeting and identify any key project issues to be discussed during the meeting. Meet goals and targets as agreed between the student and supervisor.

Project duration

Students may select two short projects or one long project that runs over the full academic year.
