Module Title:			Creative Studio				
Language of Instruction:		n:	English				
Credits:		5					
NFQ Level:		7					
Module Deli	vered In		2 programme(s)				
Teaching & Strategies:	Learning		The Problem Based Learning (PBL) teaching and learning paradigm is employed in this module. The students are initially given an induction into this way of learning. Subsequently, they are given a number of team problems to solve. Each student has the opportunity to play different roles within their team. The problems are tackled in a studio environment with supervision & guidance provided by the module tutors. At the end of the problem resolution cycle, the students present their findings to the tutors and their peers. The final element of the module sees the students tackle an individual problem that incorporates all elements from the team problems, along with some new challenges.				
Module Aim	Module Aim:		To equip the student with a solid understanding of digital art content pipeline creative process.				
Learning Ou	utcomes						
On successf	ul completio	n of th	his module the learner should be able to:				
LO1	LO1 Analyse and evaluate digital artifact requirements						
LO2	Work in teams to develop digital art for games and user interfaces						
LO3	Carry out independent research to support team work and self-evaluate outcomes						
Pre-requisit	e learning						
Module Rec			ctical skill) that is recommended before enrolment in this module.				
No recomme	ndations lis	ted					
Incompatibl These are m		h hav	re learning outcomes that are too similar to the learning outcomes of this module.				
No incompat	No incompatible modules listed						
Co-requisite	Co-requisite Modules						

RequirementsThis is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.

PRCT: Creative Studio

Module Content & Assessment

Indicative Content

Project management

Project planning & tracking. Coordinating work within a team. Agile development

Concepts art and production ready artefact production

User Experience OptimisationOptimising software and game UI to produce the optimal UX

Improve users and players tactile, emotional and aesthetic response to a software and game system through user testing, playtesting, iterative refinement and analysis of case studies

Learning & problem solving Identify, brainstorm and resolve UX/UI and conveyance problems individually and as a team

Assessment Breakdown	%
Continuous Assessment	60.00%
Project	40.00%

Continuous Assessment					
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date	
Other	Practical labs involving practising creative skills in preparation for the authentic projects	1,2,3	60.00	n/a	

Project						
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date		
Project	The students will be given a common individual problem that will require of them to consolidate all their learning from the group problems and apply this to develop more complex simulations and modelling. The assessment protocol for this problem will involve the student producing their own individual plan to tackle the problem, presenting their work on resolving the problem at the end and providing the tutors with a reflective account on their learning experience while working on this problem.	1,3	40.00	n/a		

No Practical

No End of Module Formal Examination

SETU Carlow Campus reserves the right to alter the nature and timings of assessment
