

PHYS C1501: Engineering Physics

Module Title:		Engineering Physics
Language of Instruction:		English
Credits: 5		
NFQ Level: 6		
Module Delivered In		1 programme(s)
Teaching & Learning Strategies:		This subject will be taught in theory classes of two hour duration per week and a two hour practical class each week.
Module Aim:		The aim of this module is to provide the student with an introduction to the basic principles of Physics and to develop practical laboratory skills in Physics.

Consuccessful completion of this module the learner should be able to:			
LO2	Explain the theory behind practical experiments carried out in the laboratory. Apply scientific procedures, including recording and analysing experimental data. Demonstrate an understanding of the principles behind basic laboratory instruments.		
LO3	Identify and quantify basic sources of error in laboratory experiments.		
LO4	Demonstrate an ability to work independently in a laboratory or as part of a team. Apply the appropriate safety procedures in the laboratory.		

Pre-requisite learning

Module Recommendations
This is prior learning (or a practical skill) that is recommended before enrolment in this module.

No recommendations listed

Incompatible Modules

These are modules which have learning outcomes that are too similar to the learning outcomes of this module.

No incompatible modules listed

Co-requisite Modules

No Co-requisite modules listed

This is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.

No requirements listed

PHYS C1501: Engineering Physics

Module Content & Assessment

Indicative Content

Physical standards, SI units, basic measurements, length, time, errors measurement of errors.

Vectors and scalars. Displacement, velocity, acceleration, force, gravity, friction, Equations of Motion, Newton's Laws.

Stress Strain Stress, Strain, Hooke's Law, Youngs Modulus

Components of Forces, Triangle of Forces, Polygons of Forces.

Moments of Forces

Moments of Forces, Supports, Reactions, Types of Loads.

Introduction to the Physics Laboratory; Mass Weight and Density; Acceleration Due to Gravity Using a Simple Pendulum; Hooke's Law and Experiments using a Spiral Spring; Determine Youngs Modulus for a Wire; Friction Experiments; Vector Addition of Forces/Resolving Forces; Investigating Moments of Forces; Demonstrating Newton's Laws using Pullys.

Assessment Breakdown	%
Continuous Assessment	50.00%
Practical	50.00%

Continuous Assessment				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Examination	a number of one hour exams throughout the year	1,2,3,4	50.00	n/a

No Project

Practical				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Practical/Skills Evaluation	a two hour practical each week	2,3,4	50.00	n/a

No End of Module Formal Examination

SETU Carlow Campus reserves the right to alter the nature and timings of assessment

PHYS C1501: Engineering Physics

Module Workload

Workload: Full Time			
Workload Type	Frequency	Average Weekly Learner Workload	
Lecture	Every Week	2.00	
Laboratory	Every Week	2.00	
Estimated Learner Hours	Every Week	3.00	
	Total Hours	7.00	

Module Delivered In

Programme Code	Programme	Semester	Delivery
