

<b>Module Title:</b>	Engineering Mathematics III
<b>Language of Instruction:</b>	English
<b>Credits:</b>	5
<b>NFQ Level:</b>	8
<b>Module Delivered In</b>	<a href="#">1 programme(s)</a>
<b>Teaching &amp; Learning Strategies:</b>	Lectures, practicals, private study
<b>Module Aim:</b>	The aim of this module is to develop students' understanding of differential equations and the application of these equations to civil engineering systems.
<b>Learning Outcomes</b>	
<i>On successful completion of this module the learner should be able to:</i>	
LO1	Solve more complicated first and second order ordinary differential equations.
LO2	Formulate and solve certain types of initial value and boundary value problems encountered in a civil engineering context.
LO3	Understand the application of partial differential equations to certain engineering applications.
LO4	Use a variety of numerical techniques for solving differential equations.
<b>Pre-requisite learning</b>	
<b>Module Recommendations</b>	
<i>This is prior learning (or a practical skill) that is recommended before enrolment in this module.</i>	
No recommendations listed	
<b>Incompatible Modules</b>	
<i>These are modules which have learning outcomes that are too similar to the learning outcomes of this module.</i>	
No incompatible modules listed	
<b>Co-requisite Modules</b>	
No Co-requisite modules listed	
<b>Requirements</b>	
<i>This is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.</i>	
No requirements listed	

## Module Content & Assessment

### Indicative Content

#### Further ordinary differential equations

(a) Review of first order separable and homogeneous first order ODEs. (b) Linear first order ODEs. (c) Review of linear second order ODEs with constant coefficients. (d) More complicated forms of non-homogeneous linear second order linear ODEs. (e) Initial value and boundary value problems. (f) Systems of linear first order ODEs.

#### Applications of ordinary differential equations

(a) Formulation of simple first order initial value problems. (b) Application of second order ODEs to free and forced vibrations, resonance and damping.

#### Introduction to partial differential equations

(a) Introduction to formulation of the 1-D and 2-D heat conduction equation, diffusion equation and Laplace's equation. (b) Introduction to common solutions for these PDEs.

#### Numerical methods for solving differential equations

(a) Euler's first order method. (b) Higher order methods including Range-Kutta. (c) Introduction to finite difference and finite element methods.

### Assessment Breakdown

%

Continuous Assessment

100.00%

### Continuous Assessment

Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Examination	Class test 1	1,2,4	40.00	Week 8
Examination	Class test 2	1,2,3,4	30.00	Week 13
Short Answer Questions	quiz questions	1,2,3	20.00	Ongoing
Practical/Skills Evaluation	Computer practical tasks	4	10.00	Ongoing

No Project

No Practical

No End of Module Formal Examination

SETU Carlow Campus reserves the right to alter the nature and timings of assessment

**Module Workload**

<b>Workload: Full Time</b>		
<i>Workload Type</i>	<i>Frequency</i>	<i>Average Weekly Learner Workload</i>
Lecture	12 Weeks per Stage	3.00
Estimated Learner Hours	15 Weeks per Stage	6.00
Total Hours		126.00

**Module Delivered In**
