

MATH H4501: Advanced Mathematics III

Module Title:		Advanced Mathematics III		
Language of Instruction:		English		
Credits: 5				
NFQ Level:	vel: 8			
Module Delivered In		2 programme(s)		
Teaching & Learning Strategies:		Lectures; Practical Work; Private Study		
Module Aim:		The aims of this module are: (1) to introduce students to the mathematical concepts and techniques that they will encounter in the various engineering disciplines that form part of a civil engineering degree course (2) to develop an awareness of the role of mathematics in the solution of engineering problems.		
Learning Outcomes				
On successful completion of this module the learner should be able to:				
LO1 solve prob	solve problems involving differentiation and integration;			
LO2 solve syst	solve systems of linear equations using matrix methods;			
LO3 apply vect	apply vector methods to the solution of simple problems in statics and structures;			
LO4 use MATL	use MATLAB and write MATLAB programs to model and solve civil engineering problems;			
LO5 apply stati	apply statistical methods in the analysis of risk and reliability of engineering systems.			
Pre-requisite learning				
Module Recommendations This is prior learning (or a practical skill) that is recommended before enrolment in this module.				

No recommendations listed

Incompatible Modules
These are modules which have learning outcomes that are too similar to the learning outcomes of this module.

No incompatible modules listed

Co-requisite Modules

No Co-requisite modules listed

RequirementsThis is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.

Bachelor of Engineering (Ordinary) in Civil Engineering

MATH H4501: Advanced Mathematics III

Module Content & Assessment

Indicative Content

(1) Product, quotient, chain rules for differentiation; (2) Implicit, parametric and logarithmic differentiation; (3) Integration using substitution, partial fractions and parts; (4) Partial differentiation.

(1) Matrices and matrix operations; (2) Matrix inverses, determinants and ranks; (3) Solution of systems of linear equations; (4) Eigenvalues, eigenvectors, diagonalisation.

Vectors and Vector Calculus

(1) Scalar and vector products; (2) Vector differential calculus; (3) Gradient, divergence and curl.

MATLAB

(1) Introduction to MATLAB; (2) Linear algebra and matrices using MATLAB.

Statistics
(1) Probability concepts and the axioms of probability; (2) Binomial, Poisson and geometric distributions; (3) The normal, exponential and uniform distributions.

Assessment Breakdown	%
Continuous Assessment	40.00%
End of Module Formal Examination	60.00%

Continuous Assessment				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Other	Typically end of module examinations and practical assessments.	1,2,3,4,5	40.00	n/a

No Project

No Practical

End of Module Formal Examination				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Formal Exam	Exam	1,2,3,5	60.00	End-of-Semester

SETU Carlow Campus reserves the right to alter the nature and timings of assessment

MATH H4501: Advanced Mathematics III

Module Workload

Workload: Full Time		
Workload Type	Frequency	Average Weekly Learner Workload
Lecture	30 Weeks per Stage	2.00
Practicals	30 Weeks per Stage	1.00
Estimated Learner Hours	30 Weeks per Stage	2.00
	Total Hours	150.00

Module Delivered In

Programme Code	Programme	Semester	Delivery
CW_CMHCE_B	Bachelor of Engineering (Honours) in Civil Engineering - Ab Initio	5	Mandatory
CW_CMCEN_B	Bachelor of Engineering (Honours) in Civil Engineering - Add On	1	Mandatory
