

Module Title:	Animal product quality	
Language of Instruction:	English	
Credits:	5	
NFQ Level:	7	
Module Delivered In	No Programmes	
Teaching & Learning Strategies:	Formal lectures will be complemented by practical field sessions and site visits to food producers in the South East. This will allow for a balance of theory and hands on learning activities. Classroom activities will focus on the main animal enterprises in Irish agriculture and strategies to optimise production in the most sustainable manner. Visiting lecturers will be used where appropriate to enhance the learning experience of the students and expose them to new concepts in animal production.	
Module Aim:	This module aims to build upon the content delivered in Introduction to Animal Production. Specifically the module will focus on how animal product quality can be optimised through good management principals. Focusing mainly on the quality of animal produce, the module will be consumer focused and cover strategies to produce animals in the most sustainable manner possible. The module will also introduce the concept of one health, delivering best practice in the rearing of healthy livestock for human consumption	
Learning Outcomes		
<i>On successful completion of this module the learner should be able to:</i>		
LO1	Demonstrate how quality animal products that meet market specification can maximise the return from the market place	
LO2	Understand the relationship between nutrition, animal performance and economics such that the profitability of the system is optimised	
LO3	Be fully aware of the records needed by livestock farmers and be capable of advising them on how to maintain records by the most effective means	
LO4	Differentiate and discuss the major animal diseases, including nutritional diseases and to know how to implement an economical and effective prevention programme	
Pre-requisite learning		
Module Recommendations <i>This is prior learning (or a practical skill) that is recommended before enrolment in this module.</i>		
7832	FARM H1718	Introduction to animal production
Incompatible Modules <i>These are modules which have learning outcomes that are too similar to the learning outcomes of this module.</i>		
No incompatible modules listed		
Co-requisite Modules		
No Co-requisite modules listed		
Requirements <i>This is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.</i>		
Students wishing to take this module should have completed the Level 6 Introduction to animal production or an equiv. subject		

Module Content & Assessment

Indicative Content

Animal product quality

Animal product quality needs to be consumer led. Ensuring that the meat and dairy products are optimised for human consumption is essential in the sustainability of the system. The end user approach is essential here; what are the carcass traits desired by the consumer? what is the main dairy product being produced from milk? Starting at the consumer end, this module will work backwards to demonstrate how these criteria can be met at farm level

One Health

Animal production is increasingly scrutinised for the use of antibiotics and the rise of antimicrobial resistance in society. As animal producers steps need to be taken so that antibiotics and other animal health products are used strategically, ensuring the health of the animal while limiting AMR. The use of farm health plans will be central to the delivery of this aspect of the module.

Assessment Breakdown	%
Continuous Assessment	20.00%
Project	20.00%
Practical	10.00%
End of Module Formal Examination	50.00%

Continuous Assessment

Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Multiple Choice Questions	Examination on learning outcome 1	1	5.00	Week 4
Multiple Choice Questions	Examination on learning outcome 2	2	5.00	Week 8
Multiple Choice Questions	Examination on learning outcome 3	3	5.00	Week 12
Multiple Choice Questions	Examination on learning outcome 1	4	5.00	Week 15

Project

Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Project	Students to conduct a group project on an aspect relating to animal product quality and its role in sustainable farm systems. The outcomes of this project will be presented to their peers.	1,2,3,4	20.00	n/a

Practical

Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Practical/Skills Evaluation	Students to demonstrate that they are knowledgeable in the selection of livestock suitable for the market place	1	5.00	n/a
Practical/Skills Evaluation	Students to demonstrate a knowledge of how milk quality is maintained from animal management to management of the dairy.	1,2,3	5.00	n/a

End of Module Formal Examination

Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Formal Exam	End of module examination	1,2,3,4	50.00	End-of-Semester

SETU Carlow Campus reserves the right to alter the nature and timings of assessment
