

Module Title:	Discrete Structures
Language of Instruction:	English
Credits:	5
NFQ Level:	6
Module Delivered In	3 programme(s)
Teaching & Learning Strategies:	As well as traditional lectures students will undertake in-class exercises on material presented in class. Small group tutorials will encourage further problem solving and discussion.
Module Aim:	To develop the language of computational structures and to outline a range of algorithms.
Learning Outcomes	
<i>On successful completion of this module the learner should be able to:</i>	
LO1	outline a range of algorithms for the basic data structures in the areas of graph theory and analyse computer networks using the mathematics of discrete graphs;
LO2	formulate problems using propositional logic and give examples of standard techniques of proof;
Pre-requisite learning	
Module Recommendations	
<i>This is prior learning (or a practical skill) that is recommended before enrolment in this module.</i>	
No recommendations listed	
Incompatible Modules	
<i>These are modules which have learning outcomes that are too similar to the learning outcomes of this module.</i>	
No incompatible modules listed	
Co-requisite Modules	
No Co-requisite modules listed	
Requirements	
<i>This is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.</i>	
1st Year Mathematics	

Module Content & Assessment

Indicative Content

Basic Graph Theory

Understand and use definitions and examples of walks, paths, cycles, circuits etc., Understanding and working with simple graphs. graphical representation graphs and spanning trees, Identifying bi-partite graphs Applying graph theory algorithms to un-directed weighted graphs. Using Kruscal's algorithm.

Mathematical Logic

Reviewing truth tables, propositional logic, valid Inferences. Understanding and using methods of proof. Using CNF and the resolution principle for valid statements Understanding formal proofs and proving compound statements.

Assessment Breakdown	%
Continuous Assessment	50.00%
End of Module Formal Examination	50.00%

Continuous Assessment

Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Examination	CA marks will be based on the results of in class written test	1	50.00	n/a

No Project

No Practical

End of Module Formal Examination

Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Formal Exam	Final Exam written paper	2	50.00	End-of-Semester

SETU Carlow Campus reserves the right to alter the nature and timings of assessment

Module Workload

Workload: Full Time		
<i>Workload Type</i>	<i>Frequency</i>	<i>Average Weekly Learner Workload</i>
Lecture	12 Weeks per Stage	4.00
Estimated Learner Hours	15 Weeks per Stage	6.00
Tutorial	12 Weeks per Stage	1.00
Total Hours		150.00

Module Delivered In

Programme Code	Programme	Semester	Delivery
CW_KCSOF_B	Bachelor of Science (Honours) in Software Development	4	Mandatory
CW_KCSOF_D	Bachelor of Science in Software Development	4	Mandatory
CW_KCCOM_C	Higher Certificate in Science in Computing Programming	4	Mandatory
