

Module Title:	Assembly Programming
Language of Instruction:	English
Credits:	5
NFQ Level:	6
Module Delivered In	1 programme(s)
Teaching & Learning Strategies:	Combination of lecture and laboratory sessions. Lectures will provide traditional theory. Laboratory sessions will employ formative practical/assessment sheets and learning assembly language. Project work will be based on programming in assembly language on an embedded games device
Module Aim:	Examine instruction set of a microprocessor and connected peripherals. Design, develop, test, and debug assembly language programming on an embedded games device
Learning Outcomes	
<i>On successful completion of this module the learner should be able to:</i>	
LO1	Understand the role of a microprocessor in a computer system
LO2	Understand the role of firmware within a computer system
LO3	Understand the operation of a microprocessor and develop assembly language programs for embedded games devices
Pre-requisite learning	
Module Recommendations	
<i>This is prior learning (or a practical skill) that is recommended before enrolment in this module.</i>	
No recommendations listed	
Incompatible Modules	
<i>These are modules which have learning outcomes that are too similar to the learning outcomes of this module.</i>	
No incompatible modules listed	
Co-requisite Modules	
No Co-requisite modules listed	
Requirements	
<i>This is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.</i>	
No requirements listed	

Module Content & Assessment

Indicative Content

Hardware

Exploration of Computer Hardware. Structure of a computer: CPU architecture and operation, memory, I/O; ALU, registers, fetch/execute cycle, and buses. I/O devices.

Software Models

Introduction to the layers of software / firmware architecture

Assembly Language

Programming using 68000 and 8-bit Atmel Micro-controller ATmega644 processors and instruction sets. Machine language, displaying and modifying of register and memory contents. Instruction sets: characteristics and function, modes and formats, data types, addressing, flow of control.

Assessment Breakdown

	%
Project	30.00%
Practical	20.00%
End of Module Formal Examination	50.00%

No Continuous Assessment

Project

Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Project	Assembly Programming	3	30.00	Week 22

Practical

Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Practical/Skills Evaluation	Laboratory based practicals	1,2	20.00	Every Week

End of Module Formal Examination

Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Formal Exam	No Description	1,2,3	50.00	End-of-Semester

SETU Carlow Campus reserves the right to alter the nature and timings of assessment

Module Workload

Workload: Full Time		
<i>Workload Type</i>	<i>Frequency</i>	<i>Average Weekly Learner Workload</i>
Lecture	12 Weeks per Stage	1.00
Laboratory	12 Weeks per Stage	2.00
Estimated Learner Hours	15 Weeks per Stage	5.93
Total Hours		125.00

Module Delivered In
