

NETW: Networking: Switching and VLAN Concepts

Module Title:			Networking: Switching and VLAN Concepts			
Language of Instruction:		n:	English			
Credits: 5		5				
NFQ Level:		6				
Module Deli	vered In		5 programme(s)			
Teaching & Learning Strategies:			A combination of traditional lectures and laboratory sessions will be employed. The laboratory sessions wi allow for regular formative assessment and feedback.			
Module Aim:			To provide learners with an appreciation of the characteristics, functionality and management of switches and Virtual Local Area Networks (VLANs)			
Learning Ou	itcomes					
On successf	ul completior	n of th	his module the learner should be able to:			
LO1	LO1 Demonstrate skills in configuring and troubleshooting loop-free, fault tolerant LANs.					
LO2	Appraise network requirements to design and implement suitable VLAN topologies.					
LO3 Create suitable DHCPv4 and DHCPv6 implementations to automate the process of configuring devices on distinct VLANs						
Pre-requisite learning						
<i>Module Recommendations</i> This is prior learning (or a practical skill) that is recommended before enrolment in this module.						
No recommendations listed						
<i>Incompatible Modules</i> These are modules which have learning outcomes that are too similar to the learning outcomes of this module.						
No incompatible modules listed						
Co-requisite	Modules					
No Co-requisite modules listed						
Requirements This is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.
