

Requirements
This is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.

No Co-requisite modules listed

Successful completion of year 1 or equivalent

SCIE: Pathology of Injury 2

University					
Module Title:		Pathology of Injury 2			
Language of Instruction:		English			
Credits:	5				
NFQ Level:	6				
Module Delivered In		2 programme(s)			
Teaching & Learning Strategies:		This module will be delivered via four theory classes of one hour duration per week. Students will be required to access relevant course documents, diagrams and links via Blackboard in advance of the class to encourage active learning. Module-related questions that may arise will be discussed at lectures. Pair, collaborative and group tasks will be utilized during class to facilitate learning.			
Module Aim:		To further examine the causes and mechanisms of damage and repair of neuromusculoskeletal injuries. To explore evidence for use in determining diagnosis, assessment, treatment, rehabilitation and prognosis for lower quadrant pathologies in individual patients.			
Learning Outcomes					
On successful completi	on of th	his module the learner should be able to:			
LO1 Discuss the aetiology and pathomechanisms of neuromusculoskeletal injuries in the lower quadrant.		ology and pathomechanisms of neuromusculoskeletal injuries in the lower quadrant.			
	Describe and explain how the phase of healing determines the therapy and rehabilitation strategy and propose a management protocol based on the presenting pathology				
Pre-requisite learning					
Module Recommendations This is prior learning (or a practical skill) that is recommended before enrolment in this module.					
No recommendations listed					
Incompatible Modules These are modules which have learning outcomes that are too similar to the learning outcomes of this module.					
No incompatible modules listed					
Co-requisite Modules					

SCIE: Pathology of Injury 2

Module Content & Assessment

Indicative Content

Module Content
The process of inflammation and healing in connective tissue, muscle tissue, bone tissue and neural tissue. The pathology of the Cervical spine, Thoracic spine, Shoulder girdle, Arm, Elbow, Forearm, Wrist, Hand, Lumbar spine, Sacroiliac joint, Pelvis, Hip, Leg, Knee, Shank, Ankle and Foot

Assessment Breakdown	%
Continuous Assessment	30.00%
End of Module Formal Examination	70.00%

Continuous Assessment
