

Module Title:	Physics 2 (Physics for 1st science students semester 2)
Language of Instruction:	English
Credits:	5
NFQ Level:	6
Module Delivered In	6 programme(s)
Teaching & Learning Strategies:	This subject will be taught in three theory classes of one hour duration per week and one two hour practical class each week.
Module Aim:	The aim of this module is to provide the student with knowledge of the physics of waves, electricity and radioactivity, and to develop practical laboratory skills.
Learning Outcomes	
<i>On successful completion of this module the learner should be able to:</i>	
LO1	Practice scientific procedures, including measurement, recording and analysing experimental data. Identify and quantify basic sources of error in laboratory experiments.
LO2	Apply the physics principals covered in theory to relevant problems and the natural world.
