

<b>Module Title:</b>	Computer Programming
<b>Language of Instruction:</b>	English
<b>Credits:</b>	5
<b>NFQ Level:</b>	6
<b>Module Delivered In</b>	<a href="#">3 programme(s)</a>
<b>Teaching &amp; Learning Strategies:</b>	A combination of lectures, class discussions, tutorials, laboratory exercises and demonstrations will be used. Emphasis will be placed on active learning including problem / project-based learning.
<b>Module Aim:</b>	To advance the students' knowledge in software development using a high-level programming language; to equip students with the skills and techniques required to develop software using an industry standard integrated development environment (IDE).

Learning Outcomes	
<i>On successful completion of this module the learner should be able to:</i>	
LO1	Demonstrate an understanding of software and algorithm development and the building blocks of a high-level programming language.
LO2	Utilise modular programming, flowcharts, pseudocode and debugging techniques in software development; produce clearly documented source code using a neat programming style.
LO3	Define and use a variety of data types and structures in an appropriate context.
LO4	Work as an individual or in a small group to design and implement a software solution for a real world problem using a basic textual description of the problem.

Pre-requisite learning
<b>Module Recommendations</b> <i>This is prior learning (or a practical skill) that is recommended before enrolment in this module.</i>
No recommendations listed
<b>Incompatible Modules</b> <i>These are modules which have learning outcomes that are too similar to the learning outcomes of this module.</i>
No incompatible modules listed
<b>Co-requisite Modules</b>
No Co-requisite modules listed
<b>Requirements</b> <i>This is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.</i>
No requirements listed

**Module Content & Assessment**

Indicative Content
<b>Data Types</b> Data types, arrays, strings, pointers, structures, typecasting
<b>Making Decisions and Iterations</b> Conditional statements, ternary operator, loops, nesting
<b>Functions</b> User-defined functions, passing by value and by reference, recursion
<b>Software Development, Testing and Debugging</b> Use a professional Integrated Development Environment (IDE) and debug code (breakpoints, single step), develop algorithms

Assessment Breakdown	%
Continuous Assessment	40.00%
Project	40.00%
Practical	20.00%

Continuous Assessment				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Examination	A mixture of theory and/or practical assessments to reinforce learning throughout the semester.	1,2,3	40.00	n/a

Project				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Project	A problem-based learning project based on real world scenarios.	1,2,3,4	40.00	n/a

Practical				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Practical/Skills Evaluation	A series of programming exercises to complement the theory elements of the module.	1,2,3,4	20.00	n/a

No End of Module Formal Examination

**Module Workload**

<b>Workload: Full Time</b>		
<i>Workload Type</i>	<i>Frequency</i>	<i>Average Weekly Learner Workload</i>
Lecture	Every Week	2.00
Laboratory	Every Week	2.00
Independent Learning Time	Every Week	5.00
Total Hours		9.00
