

Module Title:	Engineering Mathematics I
Language of Instruction:	English
Credits:	5
NFQ Level:	6
Module Delivered In	2 programme(s)
Teaching & Learning Strategies:	Lectures, Tutorials and Private study
Module Aim:	The aim of the module is to further develop students' mathematical skills in calculus and linear algebra and to enable them to apply these skills to engineering applications.
Learning Outcomes	
<i>On successful completion of this module the learner should be able to:</i>	
LO1	Evaluate the determinants and determine the inverses of 2nd and 3rd order matrices.
LO2	Use the matrix inverse to solve linear systems.
LO3	Apply differential calculus to a variety of engineering applications such as calculation of local maxima and minima etc.
LO4	Apply integral calculus to a variety of engineering applications such as calculation of volumes, summations etc.
Pre-requisite learning	
Module Recommendations	
<i>This is prior learning (or a practical skill) that is recommended before enrolment in this module.</i>	
No recommendations listed	
Incompatible Modules	
<i>These are modules which have learning outcomes that are too similar to the learning outcomes of this module.</i>	
No incompatible modules listed	
Co-requisite Modules	
No Co-requisite modules listed	
Requirements	
<i>This is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.</i>	
No requirements listed	

Module Content & Assessment

Indicative Content

Matrices & Determinants (25 hours lectures)

(a) Evaluation of 2nd & 3rd order determinants (b) Inverse of 2nd & 3rd order matrices (c) Solving linear systems using these theories

Calculus (25 hours lectures)

(a) Differentiation using the product rule, quotient rule and chain rule. (b) Applications of differentiation to practical engineering problems. (c) Integration of the more common engineering functions using the tables (d) Integration by substitution, parts and partial fractions (e) Basic engineering applications of integration.

Assessment Breakdown	%
Continuous Assessment	40.00%
End of Module Formal Examination	60.00%

Continuous Assessment

Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Other	2 x In class exams on topics covered	1,2,3,4	20.00	n/a
Short Answer Questions	Short answer questions of the topics covered to enable students to practice and consolidate their mathematical knowledge.	1,2,3,4	20.00	n/a

No Project

No Practical

End of Module Formal Examination

Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Formal Exam	No Description	1,2,3,4	60.00	End-of-Semester

SETU Carlow Campus reserves the right to alter the nature and timings of assessment

Module Workload

Workload: Full Time		
Workload Type	Frequency	Average Weekly Learner Workload
Lecture	Every Week	3.00
Estimated Learner Hours	Every Week	3.00
Total Hours		6.00

Module Delivered In

Programme Code	Programme	Semester	Delivery
CW_CMHCE_B	Bachelor of Engineering (Honours) in Civil Engineering	2	Mandatory
CW_CMCIV_D	Bachelor of Engineering in Civil Engineering	4	Mandatory
