

<b>Module Title:</b>	Engineering Physics
<b>Language of Instruction:</b>	English
<b>Credits:</b>	5
<b>NFQ Level:</b>	6
<b>Module Delivered In</b>	<a href="#">1 programme(s)</a>
<b>Teaching &amp; Learning Strategies:</b>	This subject will be taught in theory classes of two hour duration per week and a two hour practical class each week.
<b>Module Aim:</b>	The aim of this module is to provide the student with an introduction to the basic principles of Physics and to develop practical laboratory skills in Physics.
<b>Learning Outcomes</b>	
<i>On successful completion of this module the learner should be able to:</i>	
LO1	Demonstrate a theoretical knowledge and understanding of Physics as applied to civil engineering.
LO2	Explain the theory behind practical experiments carried out in the laboratory. Apply scientific procedures, including recording and analysing experimental data. Demonstrate an understanding of the principles behind basic laboratory instruments.
LO3	Identify and quantify basic sources of error in laboratory experiments.
LO4	Demonstrate an ability to work independently in a laboratory or as part of a team. Apply the appropriate safety procedures in the laboratory.
<b>Pre-requisite learning</b>	
<b>Module Recommendations</b>	
<i>This is prior learning (or a practical skill) that is recommended before enrolment in this module.</i>	
No recommendations listed	
<b>Incompatible Modules</b>	
<i>These are modules which have learning outcomes that are too similar to the learning outcomes of this module.</i>	
No incompatible modules listed	
<b>Co-requisite Modules</b>	
No Co-requisite modules listed	
<b>Requirements</b>	
<i>This is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.</i>	
No requirements listed	

## Module Content & Assessment

### Indicative Content

#### Measurement

Physical standards, SI units, basic measurements, length, time, errors measurement of errors.

#### Mechanics

Vectors and scalars. Displacement, velocity, acceleration, force, gravity, friction, Equations of Motion, Newton's Laws.

#### Stress Strain

Stress, Strain, Hooke's Law, Youngs Modulus

#### Forces

Components of Forces, Triangle of Forces, Polygons of Forces.

#### Moments of Forces

Moments of Forces, Supports, Reactions, Types of Loads.

#### Practicals

Introduction to the Physics Laboratory; Mass Weight and Density; Acceleration Due to Gravity Using a Simple Pendulum; Hooke's Law and Experiments using a Spiral Spring; Determine Youngs Modulus for a Wire; Friction Experiments; Vector Addition of Forces/Resolving Forces; Investigating Moments of Forces; Demonstrating Newton's Laws using Pullys.

Assessment Breakdown	%
Continuous Assessment	50.00%
Practical	50.00%

### Continuous Assessment

Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Examination	a number of one hour exams throughout the year	1,2,3,4	50.00	n/a

No Project

### Practical

Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Practical/Skills Evaluation	a two hour practical each week	2,3,4	50.00	n/a

No End of Module Formal Examination

SETU Carlow Campus reserves the right to alter the nature and timings of assessment

**Module Workload**

<b>Workload: Full Time</b>		
<i>Workload Type</i>	<i>Frequency</i>	<i>Average Weekly Learner Workload</i>
Lecture	Every Week	2.00
Laboratory	Every Week	2.00
Estimated Learner Hours	Every Week	3.00
Total Hours		7.00

**Module Delivered In**
