

### AGRI H2703: Soil science 1

Module Title:	Soil science 1	
Language of Instruction	English	
Credits:		
NFQ Level:		
Module Delivered In	No Programmes	
Teaching & Learning Strategies:	hands on learning activities. Classroom interactions between these nutrients an enhance the learning experience of the	y practical field sessions that allows for a balance of theory and activities will focus on aspects of soil nutrient content and the d the plant. Visiting lecturers will be used where appropriate to students and expose them to new concepts in soil management. and grassland farms in the South East to assess soil structure and
Module Aim:		ats understanding of the importance of soil in agricultural systems.

Learning Outcomes			
On successf	On successful completion of this module the learner should be able to:		
LO1	Recognise and apply soil fertility concepts and land use to ensure that land is managed in a sustainable manner		
LO2	Conduct infield soil tests and use this data to form a crop nutrient plan		
LO3	Critically assess the suitability of soils to grow a variety of crops		
LO4	Be capable of conducting in field assessments of soil structure		
LO5	Have a basic understanding of the influence of underlying geology on soil function		

Pre-red	uisite	learning
116-164	uisite	lear ming

Module Recommendations
This is prior learning (or a practical skill) that is recommended before enrolment in this module.

No recommendations listed

Incompatible Modules
These are modules which have learning outcomes that are too similar to the learning outcomes of this module.

No incompatible modules listed

### Co-requisite Modules

No Co-requisite modules listed

Requirements
This is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.

No requirements listed

# Module Content & Assessment

Soil nutrient management The interaction between soil nutrients and availability for the crop  Soil pH The effect of pH on the chemical properties of soil and crop growth  Physical properties of soil Assessment of soil porosity, water holding capacity and free drainage	Indicative Content	
The effect of pH on the chemical properties of soil and crop growth  Physical properties of soil		

Assessment Breakdown	%
Continuous Assessment	10.00%
Project	20.00%
Practical	20.00%
End of Module Formal Examination	50.00%

Continuous Assessment				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Practical/Skills Evaluation	Students will complete a nutrient management plan for a crop based on soil nutrient analysis	2,3	10.00	n/a

Project				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Project	Students will assess soil physical properties in a variety of cropping systems and areas in the field	3,4	20.00	n/a

Practical				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Practical/Skills Evaluation	Students will submit reports upon completion of each practical session	2,3,4	20.00	n/a

End of Module Formal Examination				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Formal Exam	An end of year exam will take place covering aspects of animal production delivered during the term	1,2,5	50.00	End-of- Semester

SETU Carlow Campus reserves the right to alter the nature and timings of assessment

## AGRI H2703: Soil science 1

# Module Workload

Workload: Full Time		
Workload Type	Frequency	Average Weekly Learner Workload
Lecture	Every Week	0.75
Practicals	Every Week	0.75
Independent Learning	Every Week	1.50
	Total Hours	3.00
