SYST: Blockchain Technology

Module Title:		Blockchain Technology			
Language of Instruction:		English			
Credits: 5					
Credits: 5					
NFQ Level:	NFQ Level: 8				
Module Deli	ivered In	4 programme(s)			
Teaching & Learning Strategies:		e teaching and learning strategies used in the module are a combination of traditional lectures and locatory exercises. The laboratory exercises include group work and peer review. The module covers a location may be a module covers a location module covers module covers a location module covers module cove			
Module Aim:		The module provides a broad understanding of blockchains and distributed ledgers, including consensus protocols, digital assets, scalability and privacy. The module puts particular emphasis on practical skills and plockchain implementations in real-life applications.			
Learning O	utcomes				
On successf	On successful completion of this module the learner should be able to:				
LO1	Understand and describe the most prevalent forms of blockchains and distributed ledgers, including their consensus protocols.				
LO2	LO2 Investigate and critically appraise the possible applications and use cases for blockchain technology.				
LO3	O3 Design and implement blockchain-based applications that involve tokens, smart contracts and/or timestamping.				
Pre-requisite learning					
Module Recommendations This is prior learning (or a practical skill) that is recommended before enrolment in this module.					
No recomme	endations listed				
Incompatible Modules These are modules which have learning outcomes that are too similar to the learning outcomes of this module.					
No incompatible modules listed					
Co-requisite Modules					
No Co-requisite modules listed					
Requirements This is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.					

SYST: Blockchain Technology

Module Content & Assessment

Indicative Content

Blockchain Taxonomies

Decentralised vs. distributed vs. centralised systems, permissionless vs. permissioned systems

The Building Blocks of Blockchain Technology
Peer-to-peer networks, gossip protocols, blocks and transactions, UTXO vs. account based transaction models, digital signatures, consensus protocols, proof-of-work, proof-of-stake, permissioned voting, Sybil attacks

Issuing and Managing Digital AssetsFungible tokens, e.g., currency, utility tokens, governance tokens, token economies; non-fungible tokens, e.g. certifications, collectibles, domain names; smart contracts; decentralised applications; oracles

Scalability and Privacy
Payment channels, digital identity and pseudonymity

Other Applications Notarization, e.g., timestamping

Assessment Breakdown	%
Continuous Assessment	25.00%
Project	50.00%
Practical	25.00%

Continuous Assessment				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Short Answer Questions	The students will answer a series of short questions that test their knowledge of consensus protocols, the issuance and management of digitals assets and real-world use cases.	1,2	25.00	Week 7

Project				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Project	The students will complete an individual project in the form of a decentralised application. The application will rely on a blockchain for some of its functionality.	2,3	50.00	Week 12

Practical				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Practical/Skills Evaluation	The students will complete weekly practicals and submit their work for assessment.	1,2,3	25.00	End-of- Semester

No End of Module Formal Examination

SETU Carlow Campus reserves the right to alter the nature and timings of assessment

SYST: Blockchain Technology

Module Workload

Workload: Full Time			
Workload Type	Frequency	Average Weekly Learner Workload	
Lecture	12 Weeks per Stage	1.00	
Laboratory	12 Weeks per Stage	2.00	
Independent Learning	15 Weeks per Stage	5.93	
	Total Hours	125.00	

Module Delivered In

Programme Code	Programme	Semester	Delivery
CW_KCCGD_B	Bachelor of Science (Honours) in Computer Games Development	8	Group Elective 1
CW_KCIAD_B	Bachelor of Science (Honours) in Computing in Interactive Digital Art and Design	8	Elective
CW_KCCYB_B	Bachelor of Science (Honours) in Cyber Crime and IT Security	8	Elective
CW_KCSOF_B	Bachelor of Science (Honours) in Software Development	8	Group Elective 1
