

Module Title:	Computer Architecture for Game Devices
Language of Instruction:	English
Credits:	5
NFQ Level:	6
Module Delivered In	1 programme(s)
Teaching & Learning Strategies:	Combination of lecture and laboratory sessions. Lectures will provide traditional theory. Laboratory sessions will employ formative practical/assessment sheets.
Module Aim:	Explore the structure, role and function of components that constitute a computer system. Examine the architecture of a computer system including constituent components, buses, memory and CPU.
Learning Outcomes	
<i>On successful completion of this module the learner should be able to:</i>	
LO1	Identify the architectural components of a computer, and understand the role of each component and inter-connector
LO2	Understand and differentiate between hardware, software and firmware
Pre-requisite learning	
Module Recommendations <i>This is prior learning (or a practical skill) that is recommended before enrolment in this module.</i>	
No recommendations listed	
Incompatible Modules <i>These are modules which have learning outcomes that are too similar to the learning outcomes of this module.</i>	
No incompatible modules listed	
Co-requisite Modules	
No Co-requisite modules listed	
Requirements <i>This is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.</i>	
No requirements listed	

Module Content & Assessment

Indicative Content
Number Systems and Data Representation Understanding and using numbers expressed in different bases. Unsigned and signed data types, addition and subtraction, floating-point representation, precision and accuracy and character storage ASCII and Floating Points
Logic Logic, Logic Gates and Circuits Flip flops, Adders and Decoders Analogue/Digital; Switching elements; Logic gates; Logic circuits, types and examples.
Software Models Introduction to the layers of software / firmware architecture
Memory RAM / ROM, Primary memory: organisation and operation; cache. Computer memory: Types, costs, organization and operation, speed. Data storage devices

Assessment Breakdown	%
Project	30.00%
Practical	20.00%
End of Module Formal Examination	50.00%

No Continuous Assessment

Project				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Project	Logic Circuit		30.00	Week 22

Practical				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Practical/Skills Evaluation	Laboratory based practicals	1,2	20.00	Every Week

End of Module Formal Examination				
Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Formal Exam	No Description	1,2	50.00	End-of-Semester

SETU Carlow Campus reserves the right to alter the nature and timings of assessment

Module Workload

Workload: Full Time		
<i>Workload Type</i>	<i>Frequency</i>	<i>Average Weekly Learner Workload</i>
Lecture	12 Weeks per Stage	1.00
Laboratory	12 Weeks per Stage	2.00
Estimated Learner Hours	15 Weeks per Stage	5.93
Total Hours		125.00
