Credits:	5
NFQ Level:	6
Module Delivered In	1 programme(s)
Module Aim:	Introduce learners to the skill of gameplay programming for specific genres. Students will understand how to program 2D games. Students will learn how to program entertaining interactions and understand the formation of harmony through actions and feedback through visuals, haptics, reactions, events and sound. The focus will be the creation of titles with engaging playability.
Learning Outcomes	
<i>On successful completion of this module the learner should be able to:</i>	
LO1	Understand the domain of programming applied to games development
LO2	Problem solving techniques applied to gameplay programming and appreciation of the game engine solutions
LO3	Interpretation and construction of algorithms to solve problems the implement sub-systems within a game title
LO4	Programming games that respond to gamer input for specific genres
