

<b>Module Title:</b>	Engineering Mathematics 4
<b>Language of Instruction:</b>	English
<b>Credits:</b>	5
<b>NFQ Level:</b>	8
<b>Module Delivered In</b>	<a href="#">8 programme(s)</a>
<b>Teaching &amp; Learning Strategies:</b>	A series of lectures will be delivered using whiteboard and data projector. The Institute Managed Learning Environment will be used to interactively communicate with students e.g. on-line test, discussion forums, reference information Mathematical software (e.g. Matlab, C) will be used by students to re-enforce the mathematical principles and practices
<b>Module Aim:</b>	To give the student sufficient mathematical knowledge to support the other modules of the course and provide a solid foundation for further studies
<b>Learning Outcomes</b>	
<i>On successful completion of this module the learner should be able to:</i>	
LO1	Find the indefinite and definite integrals and apply integration in solving engineering-type problems
LO2	Perform operations on matrices and use matrices to solve systems of linear equations
LO3	Apply vector operations in an engineering context
LO4	Solve integration and matrix problems using computer programmes
<b>Pre-requisite learning</b>
