

Module Title:	Professional Social Care Theory and Practice	
Language of Instruction:	English	
Credits:	10	
NFQ Level:	6	
Module Delivered In	<a href="#">3 programme(s)</a>	
Teaching & Learning Strategies:	The learning outcomes will be achieved through the following teaching methodologies: • Lectures - communication of knowledge and ideas from the lecturer to the student. • Problem Solving Exercises – students will work as part of a team to apply principles of social care practice to social care case studies and contemporary practice issues. Class Discussion/Debate - Students will be encouraged to actively participate in the class sessions which will develop their analytical and communication skills. • E-Learning – It is envisaged that the module will be supported with on-line learning materials. • Self-Directed Independent Learning – the emphasis on independent learning will develop a strong and autonomous work and learning practices.	
Module Aim:	The aim of this module is to provide learners with the historical developments in social care work, an understanding of the different social care contexts, and the theories, concepts and frameworks underpinning social care work in these settings. Learners are provided with the opportunity to explore their emerging professional identity, and the role and impact of self on professional practice. This module presents the relationship as core to social care work and students will learn about building and maintaining professional relationships with service users and staff. This module also aims to support students to understand ethical and regulatory responsibilities of social care work. With cross-modular connections, the module provides opportunities to apply conceptual knowledge and skills acquired in other modules to students developing professional identity. Through a focus on professional development, the module aims to consolidate students' reflective skills.	
Learning Outcomes		
On successful completion of this module the learner should be able to:
