

<b>Module Title:</b>	Dissertation
<b>Language of Instruction:</b>	English
<b>Credits:</b>	15
<b>NFQ Level:</b>	8
<b>Module Delivered In</b>	<a href="#">2 programme(s)</a>
<b>Teaching &amp; Learning Strategies:</b>	Lectures Private Research & Study
<b>Module Aim:</b>	The aims of the dissertation are to provide students with the opportunity: (1) to apply the knowledge and skills learned on the course to the solution of a quantity surveying or construction built environment problem (2) to extend their existing knowledge, expertise and skills in their chosen topic (3) to gain experience at managing a dissertation; (4) to make contact with external bodies; (5) to develop written and verbal communication skills; (6) to demonstrate their ability to carry out an independent piece of research and development work.

Learning Outcomes	
On successful completion of this module the learner should be able to:	
LO1	to manage a substantial piece of individual research and development work
LO2	to pursue an area of academic discipline of the course to a substantial depth
LO3	to search, select and critically assess literature and material relevant to a chosen area
LO4	to apply some of the theory and techniques developed during the course to the chosen area
LO5	to communicate effectively in writing a programme of work and, orally defend the dissertation in a logical, precise and coherent manner
LO6	to demonstrate ability to exercise judgment, independent thought, initiative, intellectual achievement, understanding of the chosen subject matter, and the principles being applied to develop and demonstrate the ability to manage and present the dissertation in a precise and coherent manner.

Pre-requisite learning
<b>Module Recommendations</b> <i>This is prior learning (or a practical skill) that is recommended before enrolment in this module.</i>
No recommendations listed
<b>Incompatible Modules</b> <i>These are modules which have learning outcomes that are too similar to the learning outcomes of this module.</i>
No incompatible modules listed
<b>Co-requisite Modules</b>
No Co-requisite modules listed
<b>Requirements</b> <i>This is prior learning (or a practical skill) that is mandatory before enrolment in this module is allowed.</i>
No requirements listed

**Module Content & Assessment**

**Indicative Content**

**Overview**

The dissertation provides students with the opportunity to carry out individual research, into a chosen aspect of study arising from the course programme. The Dissertation is a major aspect of the honours degree as it challenges students to fully demonstrate an individual understanding both of the depth and breadth of the subject areas. The dissertation will take the form of a substantial study in a subject area related to quantity surveying or construction built environment, largely through the exercise of independent inquiry. In consultation with course lecturers, students will decide, on a title for their dissertation within the first two weeks of the academic year. Each student will be assigned a supervisor. The exact theme of dissertation will be a result of discussion and compromise between the student and the supervisor. The actual topic of research must be in line with the course content and problems related to the work experience of students will be considered. Students will be required to attend a seminar on research methodologies (e.g. to include themes, framework, structure, questionnaire design, referencing etc.) Supervisors may recommend students to attend research seminars organized by other departments within the Institute when such seminars are relevant and useful to the dissertation project. Whatever form it takes, a dissertation will normally include all of the following elements: • A literature review; • Use of internal and external resources; • Research element; • Theoretical analysis; • Validation of new and emerging techniques researched • Interpretation of results. The balance of elements in a dissertation will depend on the exact form of the dissertation. While it is expected that each dissertation will contain a literature review, a dissertation that is based entirely on a literature review will not be acceptable. Equally an analytical dissertation must contain elements of validation and interpretation.

**Supervision of Dissertation Work**

One lecturer will coordinate overall dissertation work and will distribute an agreed Dissertation Briefing Document to each student. Other lecturers will supervise individual dissertations. The dissertation briefing document will include details of the following: • Overall Schedule • Student log book and time recording • Detailed plan and time schedule • The role of the supervisor • The format of oral presentations • The format of the final written submission • Declaration of originality in accordance with Institute guidelines • Referencing system

**General Requirements**

It is expected that the dissertation will be completed in 24 out of the 30 weeks in the academic year. This will allow time for the students to prepare for their final examinations. The report will contain a minimum of 10,000 words and a maximum of 14,500 words. The dissertation briefing document will expand upon issues around word count. Students will also be required to submit their logbook along with updated progress reports on the work during the course of the dissertation. Students will be advised about the College regulations on plagiarism and about the seriousness of breaching these regulations.

**Assessment of Dissertation**

Dissertations will be marked according to the overall scheme set out below. The weighting of the marks will be decided by the Course Board on an annual basis. • Topic and thesis definition • Literature review • Structure and methodology • Breadth and depth of the research • Analysis of relevant material and issues • Conclusions and recommendations • Management of individual research and development work • Demonstration of independent thought and initiative • Demonstration of understanding of the chosen subject matter • Quality and style of written presentation • Quality and style of oral presentations • Student's personal learning, self reflection and development

**Dissertation Library**

Students will be expected to present one copy of their bound dissertation to the Institute library, which will then form a basis of reference for future students. Dissertation submissions to the library will be subject to the approval of the Course Board. Special requirements: Total student participation of 12 hours per week is expected for this subject.

Assessment Breakdown	%
Project	100.00%

No Continuous Assessment

**Project**

Assessment Type	Assessment Description	Outcome addressed	% of total	Assessment Date
Project	No Description	1,2,3,4,5,6	100.00	Sem 1 End

No Practical

No End of Module Formal Examination
